

Multihog[®]

One Machine - One Driver - Endless Applications

De-Icing Sprayer Model Number MCS

- De-icing sprayer designed for distributing de-icing liquids, can be used on all Multihog tractors
- Manufactured from high quality 316 stainless steel
- No overhanging booms are necessary and the length of the Multihog tractor is not extended
- Spraying is achieved through 3 spray sections and powerful side nozzles to give a total spray width of 2.4 - 10 metres (7.8 - 33 ft), depending on model
- Spraying is CAN bus controlled for efficient use of de-icing fluid (spraying stops when vehicle stops)
- Safe low-level filling point and tank cut-out function to prevent over-filling
- Reversing camera can be fitted to rear of the Multihog to further reduce the risk of accident
- The sprayer is completely controlled from within the cabin, ensuring the operator stays warm and dry in adverse weather conditions
- Both low and high pressure washer hand lances can be fitted to the de-icer system
- Sprayer capacity ranges from 700 - 1500 litres (185 - 396 US gal), depending on Multihog model

Due to our policy of continuous improvement, specifications may change subsequent to publication of this sheet.
