

Multihog[®]

One Machine - One Driver - Endless Applications

Front Mower with Collection MSM 3000/3100

- Front rotary mower with grass collection via suction, can be used on all Multihog models
- Ideal for garden, municipal and landscaping operation
- 3 blades on mower are easily removable for maintenance and cleaning
- Working width of the mower is 1.2 - 1.8 metres (3.9 - 6 ft), depending on model
- Cutting height is easily adjustable from 30 - 120 mm (1.1 - 4.7")
- Hopper is mounted on rear, connected to the mower via suction hose
- Hopper capacity varies between 1.5 - 2.2m³ (53 - 77 ft³), depending on model
- Hopper is very stable, with no overhanging parts on rear - reducing accident risk
- Emptying height is 2.35 - 2.5 metres (7.7 - 8 ft), depending on model
- Low noise operation of suction hopper, under 80 dB

Due to our policy of continuous improvement, specifications may change subsequent to publication of this sheet.
