G ANT BY TOBROCO

G3500

G3500 Z-BAR / X-TRA / TELE

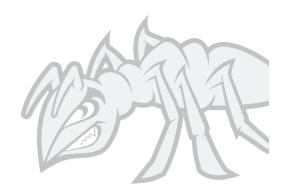

۲

Developed as powerful and reliable machines, the G3500 models are ready to work in many sectors. These compact and versatile machines can be used in construction and demolition, at nurseries, municipalities, gardeners and for agricultural applications. Users are offered a comfortable and safe working environment with good visibility which leads to efficient execution of the working activities.

CARAN

۲

۲

Compact design, big in performance

DISTINCTIVE POWER

Like all GIANT machines, the G3500 models will distinguish themselves by a high tipping load compared to their own weight. Combined with a powerful, 66 hp diesel engine, hydrostatic 4-wheel drive with automotive control and 100% switchable locking on both 14-ton axles. Due to a powerful locking on both 14-ton axles, significant performance is ensured.

TOBROCO-GIANT has developed the G3500 models entirely in-house. Only the best components have been chosen and tested extensively before they were applied to the G3500 series. TOBROCO-GIANT works closely with quality suppliers like Bosch Rexroth, Comer, Kubota and Hydac during the development of new machines. For high reliability and maximum use of the machines, all components are extensively tested under harsh conditions. This results in proven reliability, low consumption costs and a high residual value.

۲

STRONG CHARACTERISTICS

1. WORKING COMFORTABLY - A comfortable working environment has been created in the cabin, therefore long working days are no problem.

۲

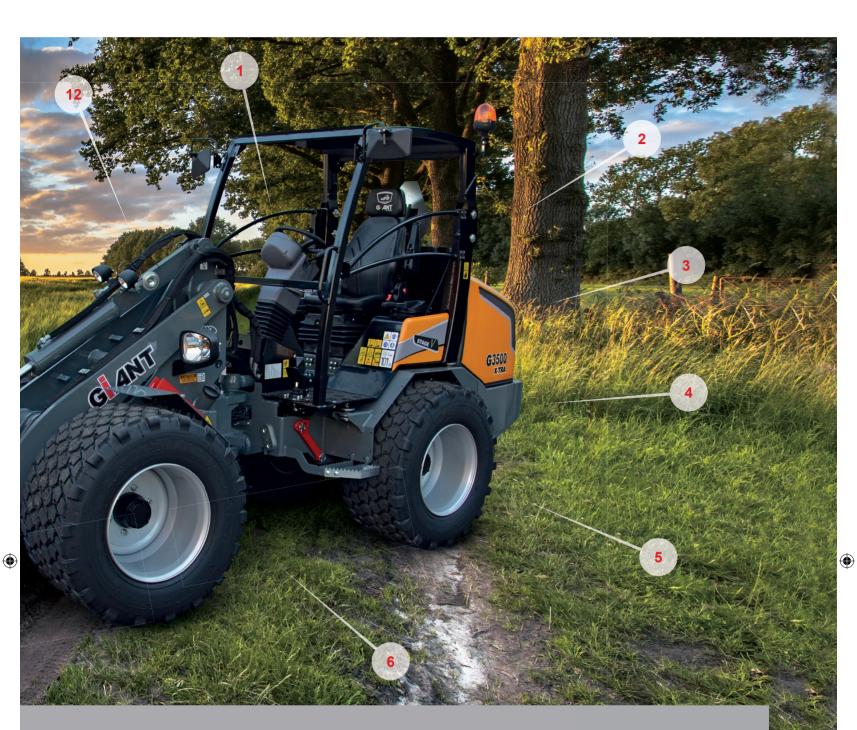

- 2. WORK SAFELY The cabin and safety roof are ROPS/FOPS certified on international standard. The use of narrow styles and skylight gives the operator all-round visibility and an excellent view on his work to allow safe and precise operation.
- **3.** EASY SERVICE Daily checks and maintenance can be carried out quickly and in a safe manner because service points are easily accessible.
- 4. **POWERFUL PERFORMANCE** The machines are driven by a powerful, 66 hp Kubota engine which provides powerful performance. The engine is equipped with a catalytic converter (DOC) and soot filter (DPF) and meet the latest EU Stage V, clean engine standards.
- 5. COMPACT DESIGN The compact dimensions ensure that the machines can operate in small spaces and even can be used indoors.
- 6. MANEUVERABILITY AND STABILITY The articulated pendulum swing system provides manoeuvrability and stability. Unevennesses are absored without any compromise to the performance.

۲

۲

11

- **7. PRODUCTIVITY** The hydrostatic 4-wheel drive with automotive control and 100% switchable lock on meets 14-tons axles, always provides enough grip, a lot of pulling force for smooth movement.
- 8. VERSATILITY Simply change the attachment and adjust the machine to your working conditions.
- **9.** HYDRAULIC POSSIBILITIES The standard double-acting function at the front (mechanically operated) can easily be expanded with additional hydraulic functions and a tandem pump.
- **10.** SPEED With a travel speed of 30 km/h, the machines can move quickly to the next working area or transport materials in no time.
- **11. CHOOSE THE MACHINE FOR YOUR WORK** The G3500 can be configured completely according to your wishes. Depending on your work you choose a Z-bar, X-TRA or TELE version with correct options.
- **12. SOLID INVESTMENT** The G3500 is a solid investment because of its reliability and high productivity. Only the best components have been chosen and tested extensively before they were applied.

PERFORMANCE

Whether transporting large quantities of loads or performing rough working activities, the hydrostatic 4-wheel drive with automotive control (Bosch Rexroth) and 100% switchable lock on both, 14-ton axles, always provides enough grip - even on loose ground. Operators can quickly drive from one construction site to another or transport materials in no time with a travel speed of 30 km/h.

G3500

۲

۲

۲

POWERFUL ENGINE

To ensure proper performance and efficient fuel consumption, the G3500 is driven by a powerful, new and reliable 48,4 kW / 66 hp diesel engine from Kubota. The engine is equipped with a catalytic converter (DOC) and soot filter (DPF) and meet the latest EU Stage V clean engine standards.

STRONG WORKING HYDRAULICS

The hydraulic system of the G3500 models is directly controlled via the joystick and is with 70l/min (220 bar) more than sufficient to drive a large number of attachments. If the working conditions demand more, then the working hydraulics can be extended to a servo-controlled version and an electrically switchable tandem pump.

"This machine is indispensable to our company because it is very powerful but also compact and extremely versatile."

Karl-Walter Berkes, Director, The Berkes Group

COMPACT DESIGN

۲

The G3500 models are designed to operate in small spaces and rough terrain. This is not only ensured by the low weight and compact dimensions: the articulated pendulum joint gives the machines a small turning circle and makes them extremely maneuverable. This ensures that work can be done very accurate.

ATRIOLIET

Depending on the choice of tires, the machines have a width between 134 and 165 centimetres. The height varies between 2,24 and 2,32 meters, depending on the choice for a safety roof or cabin. Narrow and low passages are therefore no problem and the machines can be used inside as well.

۲

G3500

۲

(

STABILITY AND MANEUVERABILITY

The articulated pendulum joint provides the G3500 a lot of stability and manoeuvrability. The system ensures that all four wheels remain on the ground, even when working on uneven terrain. This allows the driver to work safely while having sufficient traction all the time.

"The versatile telescopic loader from TOBROCO-GIANT provides the best reach, power, visibility, maneuverability and stability for our operations."

Oliver Paul, Director, Suffolk Food Hall Ltd

۲

SAFETY AND COMFORT

The spacious and easily accessible cabin of the G3500 is designed for optimum ease of use. The steering column is fully adjustable and all necessary information can easily be read from a central display. The air suspension seat with headrest is luxurious and easy to adjust for good posture. While using the multi-functional joystick, the operator can rest his arm on an ergonomically shaped armrest. All key functions are close to the joystick so that they can be operated without effort.

۲

-

STAGE V

۲

۲

G3500 TELE

WORK SAFELY

The machines are equipped with a safety roof as standard this can optionally be extended to a full-option cabin. The cabins of the G3500 machines have been extensively tested on safety by an independent authority and are ROPS/FOPS certified by international standard. All-round visibility gives the operator an excellent view on his working area and allows safe and precise operation.

ELECTRONIC CONTROL

Information about coolant, regeneration, etc., can be read from the dashboard so that the driver can always see these important data during work.

360° all-round visibility from the cabin

200+ attachments

Our attachments are developed entirely in-house so that they deliver the best results when working on our machines. TOBROCO-GIANT offers more than 200 different attachments so your machine can be used all year long. By choosing the right attachment it is possible to adjust your GIANT to working conditions for agricultural purposes, construction, material handling, private use and many other areas of application. Get every job done with just one machine!

MAINTENANCE & SERVICE

MAINTENANCE

Performing maintenance to the G3500 is no problem at all because the service points are easy to reach. Filters, hydraulic system and engine can be freely accessed via the easy-toopen bonnet, tilting cab or other service panels. This ensures that daily checks and maintenance can be carried out quickly and in a safe manner.

GENUINE GIANT PARTS

The usage of genuine GIANT parts ensures reliable, efficient and safe operation of your machine. We only use the best quality components and test them severely before we introduce a new model. All these parts are vital for the best possible performance and minimising downtime. Keeping your GIANT 100% original saves money for the owner because of reduced maintenance costs and results in a higher resale value once the machine is resold.

SERVICE & SUPPORT

۲

At TOBROCO-GIANT we offer support, service and high quality parts to protect the investment that you have made in GIANT machinery. Together with our dealers we are available to make sure that your machine performs in the best possible way. This increases your productivity and will result in an even better return on your investment.

TRAINING

At TOBROCO-GIANT we know all the details about our machines. That is why we offer an extensive training program to our dealers. Not only on the newest features or attachments, but also on how to service a machine to the highest standards.

THE FUTURE IS ELECTRIC

۲

THE COMPANY

The demand for compact electrical equipment is an unstoppable trend. With Jungheinrich, TOBROCO-GIANT has found a global and reliable partner with expertise when it comes to developing electrical machines. Everything is aimed at developing an electric version of each GIANT along to the diesel version in the long term.

DEALER NETWORK

With a large network of dedicated dealers we like to be close to our customers to provide the machines, service and parts that you demand. All dealers are supported by a team of experts from the head office of TOBROCO-GIANT in Oisterwijk, The Netherlands.

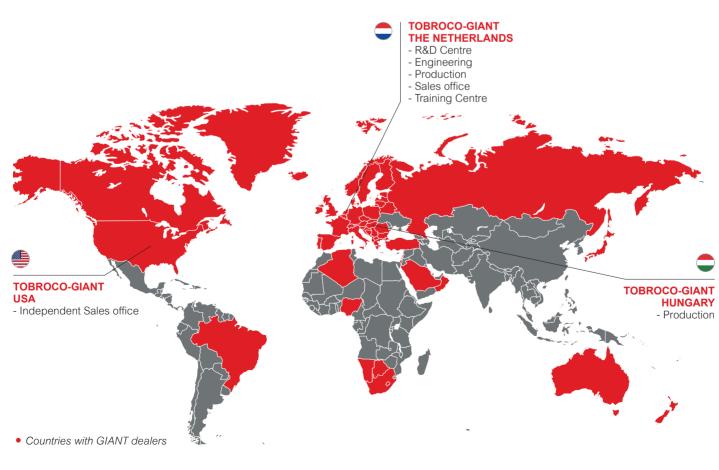

"Developed in The Netherlands, built for the world"

Within 25 years, TOBROCO-GIANT has grown into a global player in compact machines with one of the broadest portfolios in the industry. The wide range of implements ensures that all work can be carried out with one machine. This means that GIANT machines can be used all year round for all kinds of work.

In a modern factory in the Netherlands, machines and attachments are developed and produced in-house. By using the most modern technology, ensuring continuous innovation and applying the best components from Kubota, Bosch Rexroth and Comer, GIANT machines and attachments are produced with the greatest care and quality.

Every day, the team of more than 450 employees in the Netherlands, Hungary and America focuses with passion and enthusiasm on complete customer satisfaction.

19 19 R

ALLE MODELLEN

TOBROCO-GIANT has been manufacturing high-quality GIANT machines and attachments since 1996 when we opened our first factory in The Netherlands. Today, TOBROCO-GIANT offers one of the broadest product portfolios in the business with 35 different models sold in 60 countries. TOBROCO-GIANT supplies machines with service weight from 750 kg until 6.000 kg with engines from 20 hp up to 76 hp for the worldwide machine market. Which machine will you choose?
