

# Multihog<sup>®</sup>

One Machine - One Driver - Endless Applications

### Manhole Cutter MMC 950

- Manhole cutter designed for use on our MH tractor
- Can be used in construction of new roads and also restoration of pre-cast units
- Drastically reduces work times; one manhole can be exposed in 1-3 minutes using this attachment
- Increased quality of work through optimum compaction
- Designed to be hard wearing and long lasting, costs for replacing the cutter tools are low
- Cutting depth of 300 mm (12")
- No water cooling is necessary
- No problems arise from contact with gravel or rocks
- Can be transported between work sites on the front of the Multihog, saving time and money
- Other applications are possible with this attachment thanks to a range of cutter heads
