

Multihog[®]

One Machine - One Driver - Endless Applications

Snow Brush

MRSB 2300

- Front-mounted snow brush, suitable for MH/MX ranges
- Heavy duty PPN spiral segment brush with roller levelling and rubber spray protector
- Ideal for municipalities, airports, maintenance contractors and facilities management companies
- 2300 mm (90 in) working width and features hydraulic lift, tilt and angle
- 30° swivel to each side, controlled via joystick from within cabin
- Diameter of main snow brush is 660 mm (26 in)
- All functions of the sweeper are hydraulically controlled from within the Multihog cabin - ensuring the operator remains warm and dry

Due to our policy of continuous improvement, specifications may change subsequent to publication of this sheet.
