

Multihog[®]

One Machine - One Driver - Endless Applications

V Snow Plough MVSP

- Range of heavy duty V snow ploughs to suit our MH, MX & CX tractor ranges
- 2-blade sliding blade snow plough, the blades are suspended with abrasion-proof sliding blocks on the plough frame
- High grade steel and excellent weld quality for durability and longer life
- Automatically reacts to obstacles; protective rubber elements readjust the plough into clearing position upon contact with an obstacle
- Plough design keeps windscreen snow-free for maximum visibility
- Clearing width up to 2600 mm (102 in), depending on model
- Plough width up to 3030 mm (119 in), depending on model
- Plough height up to 960 mm (38 in), depending on model
- Fully controlled from within Multihog cabin - operator stays warm and dry, and risk of accident or injury is reduced
- Features hydraulic lift, tilt and angle - plough pivots 30°

Due to our policy of continuous improvement, specifications may change subsequent to publication of this sheet.
